

SAGAR KAMBLE

+91 7972555358 | sagarit620@gmail.com

CAREER OBJECTIVE

Seeking a role to leverage over **4** years of experience with **Cloud** and **DevOps** tools such as **Terraform**, **Kubernetes**, and **AWS**, to build efficient, scalable cloud solutions through automation.

BRIEF OVERVIEW

- Certified in **AWS Solutions Architect** – Associate Level.
- Having **4+** years of experience working in IT Domain.
- Proficient with **AWS** services such as (**EC2, S3, IAM, VPC, EFS, EKS, ECR, Lambda, SSM, RDS, CloudFormation, Route 53, CloudFront, Autoscaling, Load balancer**).
- Expertise in Infrastructure as Code using **Terraform** and configuration management with **Ansible**.
- Strong background in containerization and orchestration using **Docker** and **Kubernetes**.
- Worked on **Docker** with customized different images and used **docker-compose** to run multiple containers.
- Worked on **Kubernetes**, Creation of Kubernetes Cluster and Created Deployments and Services for running Application, Creation of Persistent Volume, Persistent Volume Claim and used them for Pod creation.
- Skilled in designing, implementing, and managing CI/CD pipelines with **GitLab** and **Jenkins**.
- Worked on monitoring and troubleshooting using **Prometheus, Grafana**, and **AWS CloudWatch, CloudTrail**.
- Installed and managed **SSL certificates** across servers to ensure secure communication.
- Created **stepwise SOPs** and **documentation** for infrastructure automation and deployments.
- Worked on proactive incident management and maintaining high availability in cloud infrastructures.
- Worked on **Bash scripting** for automation and system tasks.

PROFESSIONAL EXPERIENCE

➤ Kyndryl Inc. (Payroll-Outworks Solutions Pvt, Ltd.)

Client: **IBM- Vodafone Idea Ltd**

Projects: **Number Portability Gateway (NPG), FMS (Monitoring)**

Role: *Application Support Engineer (DevOps)*

*Pune, Maharashtra
Sep 2022 – Dec 2024*

- Built and managed CI/CD pipelines using **GitLab CI and Jenkins**, accelerating deployments and reducing manual effort by **70%**.
- **Automated AWS infrastructure** with **Terraform**, provisioning and managing resources like EC2, VPC, IAM, S3, RDS, EFS, SQS, SES, CloudFront, and ECR, EKS.
- Configured and maintained **EC2 instances** and **Kubernetes (EKS) clusters**; created Deployments, Services, Replica Sets, and Persistent Volumes.
- Deployed Docker-based microservices and orchestrated them on Kubernetes across multiple regions to ensure **high availability and scalability**.
- Integrated **Prometheus and Grafana** for system monitoring, improving real-time incident detection by **60%**.
- Implemented centralized logging and alerting using **CloudWatch, CloudTrail, and SNS**, integrated with **ServiceNow and Remedy** for faster incident response.
- Utilized **Git** for version control and collaboration, streamlining code management and enabling effective team workflows.

- Resolved **S3 and S4 incidents** within SLA by identifying root causes, applying permanent fixes, and collaborating with stakeholders.
- Enforced cloud security best practices by developing **IAM roles/policies**, managing **VPC security groups**, and handling **SSL certificate renewals**.
- Implemented **Auto Scaling Groups with Load Balancers**, optimizing resource usage and reducing idle costs by **40%**.
- Created automation tools using **Bash and Python** for health checks, backups, and disaster recovery (EBS snapshots, S3 versioning).
- Authored comprehensive **SOPs and runbooks** covering deployments, rollbacks, incident management, and operational workflows.
- **Conducted Disaster Recovery (DR) drills** regularly to validate backup strategies and ensure recovery readiness.
- Renewed and rotated **SSL certificates** proactively to avoid production downtime.
- Analyzed logs and metrics for performance tuning, reducing system latency by **25%**, and enhancing reliability.
- Used **CloudFormation templates** to deploy infrastructure in a version-controlled, repeatable manner.

➤ **Bravezone Softech Pvt. Ltd.**

Client: RBL Bank

Project: Banking System Optimization & Monitoring

Role: Application Support Engineer (DevOps)

*Pune, Maharashtra
Apr 2020 – Sep 2022*

- Managed **on-premises and cloud virtual machines**, provisioning infrastructure using **Terraform** to meet diverse client requirements.
- Installed and configured various middleware and application servers to support client deployments and ensure smooth operation.
- Monitored and optimized system performance, applying patches and updates to maintain security and reliability.
- Developed and executed **Ansible playbooks** for configuration management and routine system maintenance, improving operational efficiency by **30%**.
- Created shell scripts for **automated backups, health checks, and log aggregation**, reducing manual intervention and errors.
- Managed **AWS Systems Manager (SSM)** for automated patching, instance maintenance, and secure remote access using Session Manager.
- Built and customized **Docker containers and images** to standardize development and testing environments, enhancing consistency by **40%**.
- Developed basic **CI/CD pipelines** using **GitHub, Jenkins, and Ansible** for Dev, UAT, and Prod environments, accelerating deployment frequency.
- Collaborated closely with developers to troubleshoot application issues promptly, reducing downtime by **25%**.
- Documented detailed **SOPs for deployment, incident handling, and rollback processes** to ensure knowledge continuity and faster recovery.

SKILLS

- **Cloud Platforms:** AWS (EC2, IAM, VPC, S3, RDS, SSM, EKS, EBS, EFS, Lambda, CloudWatch, CloudFront, SNS, AWS SSM)
- **Infrastructure as Code:** Terraform, Ansible
- **Containerization & Orchestration:** Docker, Kubernetes (EKS)
- **CI/CD & Automation:** GitLab CI/CD, Jenkins
- **Monitoring & Logging:** Prometheus, Grafana, AWS CloudWatch
- **Operating Systems:** Linux (Ubuntu, Red Hat), Windows
- **Scripting & Programming:** Shell Scripting
- **Ticketing & ITSM Tools:** BMC Remedy (Helix), ServiceNow
- **Networking & Security:** TCP/IP, DNS, DHCP, Firewalls, LAN/WAN

CERTIFICATION:

- **AWS Certified Solutions Architect – Associate**

EDUCATION

- ***Bachelor of Engineering***
University: Kavayitri Bahinabai Chaudhari North Maharashtra University Jalgaon
 - Graduated with a CGPA of 7.62/10 (67.75%)
- ***Higher Secondary Education (12th)***
College: Kai. Sau. G. F. Patel Jr. College Shahada, dist.- Nandurbar
 - Graduated with Percentage: 56.33%
- ***Secondary Education (10th)***
School: Sheth V. K. Shah Vidya Mandir, Shahada, dist.- Nandurbar
 - Graduated with Percentage: 80.73%

PERSONAL DETAILS:

- **Name:** Kamble Sagar Sanjay
- **Date of Birth:** 12th March 1995
- **Nationality:** Indian
- **Language Known:** English, Hindi, Marathi
- **Present Address:** Hinjewadi, Pune, Maharastra (411057)
